THE ULTIMATE SUITS YOU

WE'RE CREATING THE ULTIMATE

At Mackenzie Health, delivering the ultimate care starts with learning. From front-line health professionals to staff and volunteers, every member of our team is committed to the pursuit of new knowledge, skills and care practices that will have a positive impact on our patients' experiences and outcomes.

In the Giovanni De Gasperis ♦ Eugene Kohn Learning Centre at Cortellucci Vaughan Hospital, we will harness the power of technology to offer more workshops, lectures and hands-on learning opportunities, and introduce innovative tools to help our team learn, consult and collaborate with health experts and organizations across the region and around the world.

We invite you to join us in creating the ultimate.

A LEARNING LEADER AMONG CANADA'S HOSPITALS

The Giovanni De Gasperis ♦ Eugene Kohn Learning Centre at Cortellucci Vaughan Hospital will be one of the first and most comprehensive learning and conference centres within a Canadian hospital. Featuring an auditorium, conference and break-out spaces alongside laboratories for clinical teaching and health simulation, it will be both a hub for continuous learning and development within the hospital and a catalyst for knowledge sharing with community members, health experts and organizations beyond our walls.

ONE-STOP CONTINUOUS LEARNING

From the latest electronic medical record updates to new best practices for surgical care, Mackenzie Health's administrative and clinical staff are constantly upgrading and refining their skills to improve patient care and outcomes. In the new, high-tech centre for continuous learning at Cortellucci Vaughan Hospital, our team will have one-stop access to a range of integrated learning opportunities, from large-scale lectures and small-group workshops, to computer-based learning and hands-on training and simulations.

CONNECTING WITH THE WORLD

Using technology, we will link our team with continuing medical education and certificate courses and experts throughout the region and beyond. The clinical teaching laboratory will also include videoconferencing and digital file sharing capabilities to allow Mackenzie Health's clinicians to consult on complex cases across our two hospital sites, at our community-based locations and with specialists at other health care centres.

From
3,500
staff today, Mackenzie Health
will grow to approximately
5,600
continuous learners with the
opening of Cortellucci Vaughan
Hospital in early 2021.

“We’re recruiting the best possible clinical talent and then giving them the space, resources and time to continue to advance their skills. This is how a world-class health experience becomes a reality.” — DR. STEVEN JACKSON, CHIEF OF STAFF, MACKENZIE HEALTH

LEARNING STARTS HERE

INTRODUCING THE GIOVANNI DE GASPERIS ♦ EUGENE KOHN LEARNING CENTRE

Named to honour two generous philanthropic families, the Giovanni De Gasperis ♦ Eugene Kohn Learning Centre will include four distinct learning areas:

BERWICK FAMILY AUDITORIUM

A high-tech, multi-purpose space capable of seating up to 400 in one large or up to three smaller rooms, the Berwick Family Auditorium will be an ideal venue for large hospital meetings, events and conferences involving the Mackenzie Health team and our many health care and academic partners.

The auditorium may also host patient and public events addressing current health and wellness topics, and community information meetings hosted by Mackenzie Health and Mackenzie Health Foundation.

CONFERENCE AND LEARNING SPACES

Immediately adjacent to the auditorium, the Learning Centre's two classrooms will include removable walls to create up to four break-out rooms outfitted with the latest learning tools and technologies. One of the two classrooms will also provide remote videoconferencing to support continuing medical education for our physicians and certification courses for our allied health providers. Another two Information Communication Automation Technology training classrooms will offer computer-based learning in subjects ranging from software upgrades to the electronic medical records system.

CLINICAL TEACHING LABORATORY

In the Clinical Teaching Laboratory, physicians, nurses and other allied health professionals will receive instructional and hands-on training in new clinical and technical skills, such as how to use cardiac, telemetry and neurologic equipment. The 50-seat laboratory will also include videoconferencing and digital file-sharing capabilities to support consultations between clinicians at Mackenzie Health and our partner hospitals throughout the region.

SIMULATION LABORATORIES

Rehearsing team responses to a cardiac arrest or how to intubate a newborn are just two of the many mock procedures and skills training sessions that will be available in Cortellucci Vaughan Hospital's two simulation laboratories. Connected by a control room that doubles as an observatory, the labs will offer a simulated hospital environment where clinicians can safely practice their diagnostic, surgical and problem-solving techniques and procedures on high-tech mannequins before applying them in a live hospital setting.

A PARTNERSHIP FIRST WITH VAUGHAN PUBLIC LIBRARY

Steps away from the Learning Centre, along Cortellucci Vaughan Hospital's Main Street corridor, clinicians, staff, patients and their families will have access to a fully-functioning branch of the Vaughan Public Library. Bright and spacious with glazed glass walls, the 3,700-square-foot facility will feature the same access to books, resources and programming available at every Vaughan Public Library branch, including educational activities for children, families and members of the public, and electronic databases on wide-ranging subjects, including health and medicine.

The Giovanni De Gasperis ♦ Eugene Kohn Learning Centre will be highly visible from Major Mackenzie Drive and prominently positioned near the main hospital entrance, where its showpiece architectural design and strategic location will symbolize Mackenzie Health’s commitment to creating the ultimate health experience through learning, development and innovation.

- 1 The Learning Centre will be accessible through a dedicated entrance with a canopied drop-off area and also via the east-wing of the Main Street corridor, just inside Cortellucci Vaughan Hospital’s main entrance.
- 2 The auditorium, classrooms and laboratories will be clustered around a large glass-walled outdoor courtyard that will bring natural light into the corridor and offer learners space for rest and reflection. It will also serve as a fitting venue for hospital, patient and public events and gatherings.
- 3 A service elevator connecting the conference centre and hospital catering kitchen will allow ready access for meals and refreshments.
- 4 All the learning spaces will feature the latest sound, video and digital technologies, and will be accessible remotely for presentations, workshops and training sessions at Mackenzie Health’s network of sites, including Mackenzie Richmond Hill Hospital and our community-based locations.
- 5 The centre’s green roof is part of Cortellucci Vaughan Hospital’s pursuit of a Silver LEED Canada certification and reflects Mackenzie Health’s commitment to environmental leadership.

MORE KNOWLEDGE, BETTER OUTCOMES

THE IMPACT OF YOUR INVESTMENT IN LEARNING AND DEVELOPMENT

Your investment in the learning experience at Cortellucci Vaughan Hospital will impact every hospital stakeholder, from doctors, nurses and allied health professionals who are learning together where they work, to the patients and their families who will benefit from our advanced care and outcomes. And your gift will reach even further, positioning Cortellucci Vaughan Hospital as a hub of health information and a catalyst for connecting health experts across our region and province.

THE ULTIMATE IN CARE

By advancing their knowledge and skills, and developing new approaches and innovative models of care, our health care providers will contribute to a world-class health experience and better patient outcomes.

LEARNING TOGETHER

Shared learning experiences for clinicians and staff in every hospital department will create opportunities for our team to learn, problem solve and work together. Collaborative learning inspires innovation, improved effectiveness and increased satisfaction.

IMPROVED EFFICIENCIES

In-house learning and multi-professional forums will eliminate the need to travel downtown and beyond, improving efficiency and reducing costs.

HEALTH CARE LEADER

The Giovanni De Gasperis ♦ Eugene Kohn Learning Centre will position Mackenzie Health as a health care education leader that can attract and retain the best staff, physicians and leaders in their fields. Our innovative spaces and culture of learning will host physicians and other health care professionals in the city, region and GTA for workshops, conferences and meetings.

“Having learning as a cornerstone of our facility opens the door to our community in new and different ways. We’re inviting people to see Cortellucci Vaughan Hospital as a community destination for excellence in patient care as well as for learning.” — STAV D’ANDREA, VICE PRESIDENT, PEOPLE SERVICES AND CHIEF HUMAN RESOURCES OFFICER

THE ULTIMATE LEARNING AT MACKENZIE RICHMOND HILL HOSPITAL

Investments in the ultimate learning at Mackenzie Health will also help upgrade the learning spaces, resources and technologies at Mackenzie Richmond Hill Hospital. Redevelopment plans are now underway. We look forward to sharing details and naming opportunities as they become available.

HELP US CREATE THE ULTIMATE

To help build and equip Cortellucci Vaughan Hospital and enhance care at Mackenzie Richmond Hill Hospital, Mackenzie Health Foundation is spearheading the \$250-million Ultimate campaign — the largest fundraising drive led by a community hospital in Canada. We need your support to make it happen. Your leadership investment will help create the learning and development spaces that are key to our continuing ability to deliver the ultimate in care.

If you have any questions about Mackenzie Health's vision for patient care, the Ultimate campaign or to discuss naming one of our prominent learning spaces, please contact:
